

A scrim that's **ultra-light** with an **extra-fine mesh**, it works extremely well with **laser lightshows** for creating **breathtaking stage lighting**. **M1 flame-retardant** rated, this scrim is available in 2 colours - white and black - for breathtaking **laser effects**.

We recommend multi-layer use for **incredible depth effects**! Alternate and **combine with Laser Voile** for even more breathtaking effects!

Like most scrim materials, it allows sound to pass, offering perfect **acoustic transparency** meaning it can be installed in front of sound sources such as speakers, public address systems, etc.

Versatile and **great-value**, this "bridal-veil" scrim can also be used as an original surface for both **front-projection** and **rear-projection**, but also for **decoration** for all your events, including receptions, weddings, parties, etc.

It is generally recommended to protect this flame-retardant polyester scrim from the elements.

Technical data	Value	Notes
Mesh size	2 x 2 mm	Square mesh
Width	300 cm	
Weight	70 g/m ²	
Thickness	0.3 mm	
Flame-retardant rating	 M1	Standard: NF P 92-503-507
Composition	100% flame-retardant polyester	
Roll length	30 m, Rolled centre-folded	Cut-to-length possible
