

Rear-Projection Screen— Anthracite

Ref. 2222

Azur Scenic

190

The darkest flexible PVC sheet on the market, rated **flame-retardant**, ideal for making **rear-projection screens** and **cycloramas** installed in the darkest locations.

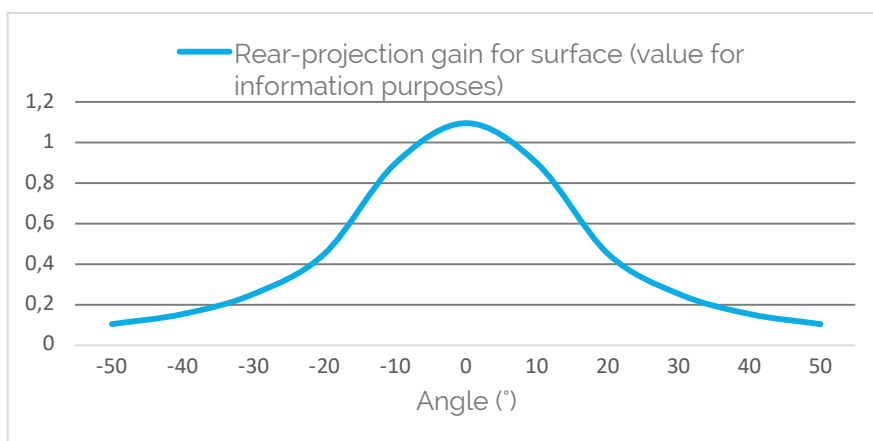

The anthracite colour offers an **excellent contrast** combined with a strong colour quality.

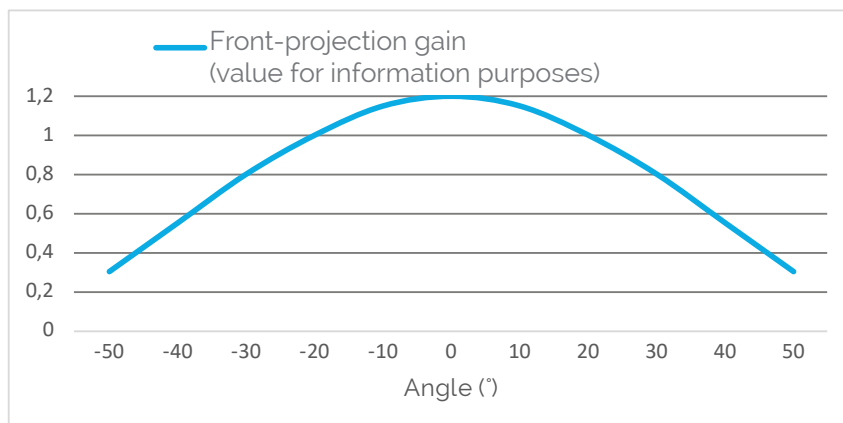

This versatile screen can also be used for **front-projection** (product more suitable for rear-projection).

We ensure the **flattest** possible surface, working in our HF welding workshops to offer **suspended** screens, **frame-tensioned** screens and even screens mounted on **motorised rollers** with super-thin, super-smooth and **virtually-invisible welds**.

This PVC screen is **washable** and suitable for indoor and **outdoor use**, and also has **sound insulation** properties.

Technical data	Value	Notes
Width	220 cm	
Weight	450 g/m ²	
Thickness	0.3 mm	
Flame-retardant rating	 B-s1,d0	Standard: EN 13501-1
Composition	100% PVC	
Roll length	100 m	Cut-to-length possible

Additional information

Care	Wash with soapy water, rinse with fresh water. Do not use harsh abrasive detergents. We recommend testing cleaning products on a small area before cleaning the entire surface.
Storage recommendations	Store indoors (away from light sources) at room temperature ($\pm 23^{\circ}\text{C}$). Storage should not exceed 6 months between use.
Directions for use	The screen must be stored at room temperature ($\pm 23^{\circ}\text{C}$) for a minimum of 24 hrs before use. The screen offers one matte grained side and one smooth side with a more glossy finish. For optimum projection quality, we recommend positioning the grained side towards the audience.
High-frequency (HF) welding	Excellent HF weldability. Using virtually invisible assembly seams, we make screens of all dimensions and finishes in our own workshops.
Accessories	Weighting poles Elastic tensioners, bungees
